Education

Ph.D in Computer Science, Stony Brook University — F2014 - Present

B.S in Computer Science, Vietnam National University - HCMUS — F2008 - S2012

Research Background

Fifth-year Ph.D. Candidate with a background on Computer vision and Machine Learning. My work focus on developing machine learning techniques for image and video segmentation from weakly-labeled and unsupervised data. My recent papers analyze the effect of shadow on images: how to detect and remove them. I have working experiences in medical imaging and remote sensing data.
